

datacollection

SalesPad™ DataCollection

SalesPad DataCollection is a Windows Mobile® barcode data collection application that integrates fully with the SalesPad platform and Microsoft Dynamics™ GP. With DataCollection operating on a Windows Mobile® device equipped with a scanner, users can scan receipts of a product, locate inventory and scan products for bin transfers, or as they are fulfilled to orders.

Combined with the functionality of SalesPad and Microsoft Dynamics™ GP, DataCollection users can enter purchase receipts, print bar-coded receiving or fulfillment paperwork, and item barcode labels in one application.

Features

- Pick, pack and ship
- PO receiving
- Bin transfers
- Label printing
- Windows Mobile® compatible

Processes

Purchase Order Receiving

- The user prints a bar-coded receiving copy of the purchase order
- The user scans or enters the PO number on the handheld
- The user scans or enters the item number and quantity received on the handheld
- Optionally, the user may scan or enter the item's serial or lot number

Inventory Bin Transfers

- The user scans or enters the item number
- The user enters From and To bin numbers
- The user enters the quantity to be transferred and submits the transaction
- Optionally, the user may scan or enter the item's serial or lot number

Sales Order Fulfillment

- The user prints bar-coded picking paperwork from within SalesPad
- The user scans or enters the sales order number on the handheld
- The user scans or enters the bin number, item number and quantity on the handheld
- Optionally, the user may scan or enter the item's serial or lot number

Additional Functionality

- Users may now print a consolidated (bulk) picking ticket for a range of orders.
The picking ticket will be sequenced by bin number
- Users may now print bar-coded item labels from within SalesPad
